OBJECTIVE

Aspiring Cloud Engineer with a strong interest in AWS cloud services, cloud security, and automation. Seeking an opportunity to apply technical skills, gain hands-on industry experience, and contribute to building secure and scalable cloud solutions.

EDUCATION

Jain University — B.Tech, Computer Science

2023 – 2027

CGPA: 8.7

SKILLS

Languages: Python, Bash

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, Ansible

Tools & Platforms: Git, GitHub, Linux

PROJECTS

Phantom Surface — Intelligent Attack Surface Mapping System

- Built an automated attack surface discovery system in Python to identify and map external assets including domains, subdomains, IP addresses, and exposed services.
- Benchmarked detection accuracy against existing tools, with a documented comparison of false positive rates.
- Tech: Python, reconnaissance APIs, Linux, Bash

Dockerized React Application

- Containerized a React.js application using Docker, ensuring consistent builds and runtime behavior across environments.
- Used Docker Compose to orchestrate multiple services (React app + Nginx reverse proxy), simplifying multi-container deployment.
- Tech: React.js, Docker, Docker Compose, Nginx

EXPERIENCE

Front-end Web Development Intern — MotionCut

Jan 2025 – Mar 2025

- Implemented HTML/CSS styling tasks for assigned web pages as part of a structured internship program, translating design requirements into responsive markup.
- Gained practical exposure to front-end workflows and collaborative task delivery in a remote internship

setting.

CERTIFICATES

- TryHackMe — Security Engineer Learning Path
- Google — Crash Course on Python
